

Guam Public Library System Inspection Procedures for Government Vehicles

Government vehicle inspection procedures are on a yearly basis. The government vehicles will need to go through the Safety Inspection and Registration process annually. Oil changes are also required on a 6 month basis, depending on the availability of funds. In order for GPLS government vehicles to be serviced and inspected, the department will have to go through the procurement process for a Purchase Order to be issued by General Service Agency (GSA) to a vendor to perform the Safety Inspections and the oil changes.

Listed below are the Government Vehicles within the Guam Public Library System.
